

If you have already completed the following procedure, reset the robot vacuum by setting the red switch on the side of the robot to 'off' for at least ten minutes.

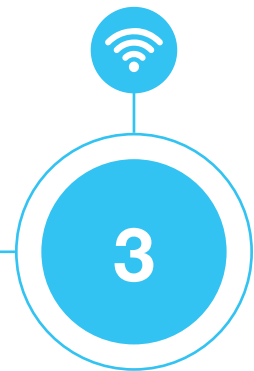

INSTRUCTION

Make sure the robot is fully charged.

Remove the robot from the docking station (charger).

Place the robot close to your router.

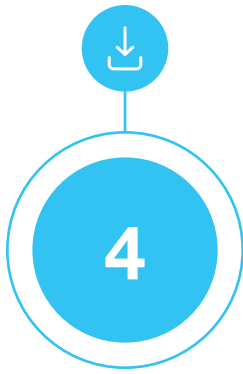

It is not possible to register the robot in the app while it is physically in the docking station.

Download the app for your specific robot.

(BluebotXS Plus for the XSmart or Bluebot Robotics app for the XEasy)

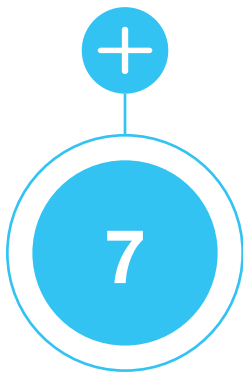

Make sure your phone is connected to the 2.4 GHz Wi-Fi network.

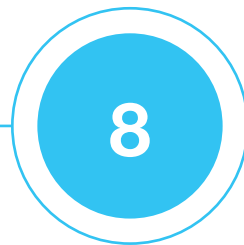

Open the app and register yourself; select 'Europe' as your area.

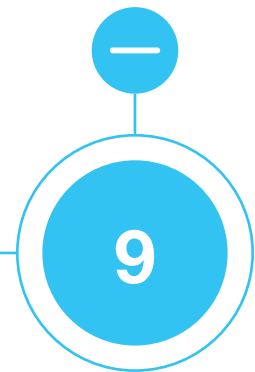

Please note that the robot works on a frequency of 2.4 GHz only.

Click the '+' to add the robot.

Select the robot model you have.

Make sure the on/off switch is set to 'on'. This is the red switch on the side of the robot.

Wait until the robot has started fully.

(XSmart)
Press and hold 'edge clean' until 'CONN' appears on the screen.

Continue to the next step in the app.

(XEasy)
Press and hold the button on the top until it begins to blink.

Use the blue button to 'Reset'.

Select your Wi-Fi signal.

If you do not know which Wi-Fi signal is the 2.4 GHz signal, or if the 2.4 and 5 GHz frequencies have the same Wi-Fi name, consult the user manual for your router.

The robot will work on a 2.4 GHz signal only.

IMPORTANT: select your 2.4 GHz Wi-Fi network here.

**Available during EU office hours*

Enter your password for the 2.4 GHz Wi-Fi connection.

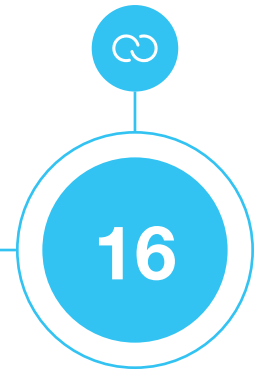

Press the 'home' button on your phone and go to the Wi-Fi settings.

Select the network that begins with *blaupunkt_*; return to the app.

For Android phones:
Do NOT use the "Back" button, use the "Home" button instead.

The app will now connect to the robot.

Hold the telephone in close proximity to the robot.

If you have been successful, your robot will now be displayed in the app.
